

## City of Elyria

1,2,3 Family Foundation Repair / Replacement or Waterproofing

### Permit Worksheet

The purpose of this worksheet is to inform you of the requirements for this permit type and allow for you to calculate any fees prior to actually submitting the request for the permit. This worksheet is for your use only and does not qualify as an official permit application. Permit applications can be submitted through <https://www.cityofelyria.org/ePermits> or in person to the Building department at 131 Court Street, Suite 101

---

**It is the applicant's responsibility to provide all required drawings. If you haven't the ability to do so, please consult someone who does.**

**Note:** A sump pump discharge must be connected to the City storm sewer if available, unless otherwise approved by the City. **In no case shall the footing drains or sump pump be permitted to discharge into the sanitary sewer.**

**Warning:** If, during the course of construction, a connection pipe to the sanitary sewer is exposed, **the cross section must be removed and the water from footing drains shall be mechanically removed** by pumping it to an approved outlet. The owner and/or contractor are responsible for requesting an inspection before covering or concealing any work and shall inform the City of Elyria of any exposed cross connections. Failure to comply may result in legal action by the City of Elyria.

The owner or owner's agent, by commencing or authorizing commencement of work, takes full responsibility for compliance with City, State, and Federal codes relative to discharge of "clean" water to a sanitary sewer or combination sewer system.

(\$35.00 + \$12.00 per \$1,000 of total cost of construction or fraction thereof.)
